# SKYHASH

# BRAND-NEW ICO
# Project SKY-NET

SKY-NET is the mining platform with the one and only function in the world, which is developed for miners all over world to demonstrate the true decentralization.

# The Ultimate Platform That Shapes The True Decentralization

SKY-NET is an one-stop platform designed for enabling users to access multiple services.Not only users who mine but also the average Crypto users can join our services via Cloud Mining, or Hosting Service.We will develop and provide our services for the various kinds of users to mine, keep, exchange, trade, and transfer assets with P2P in a seamless way.
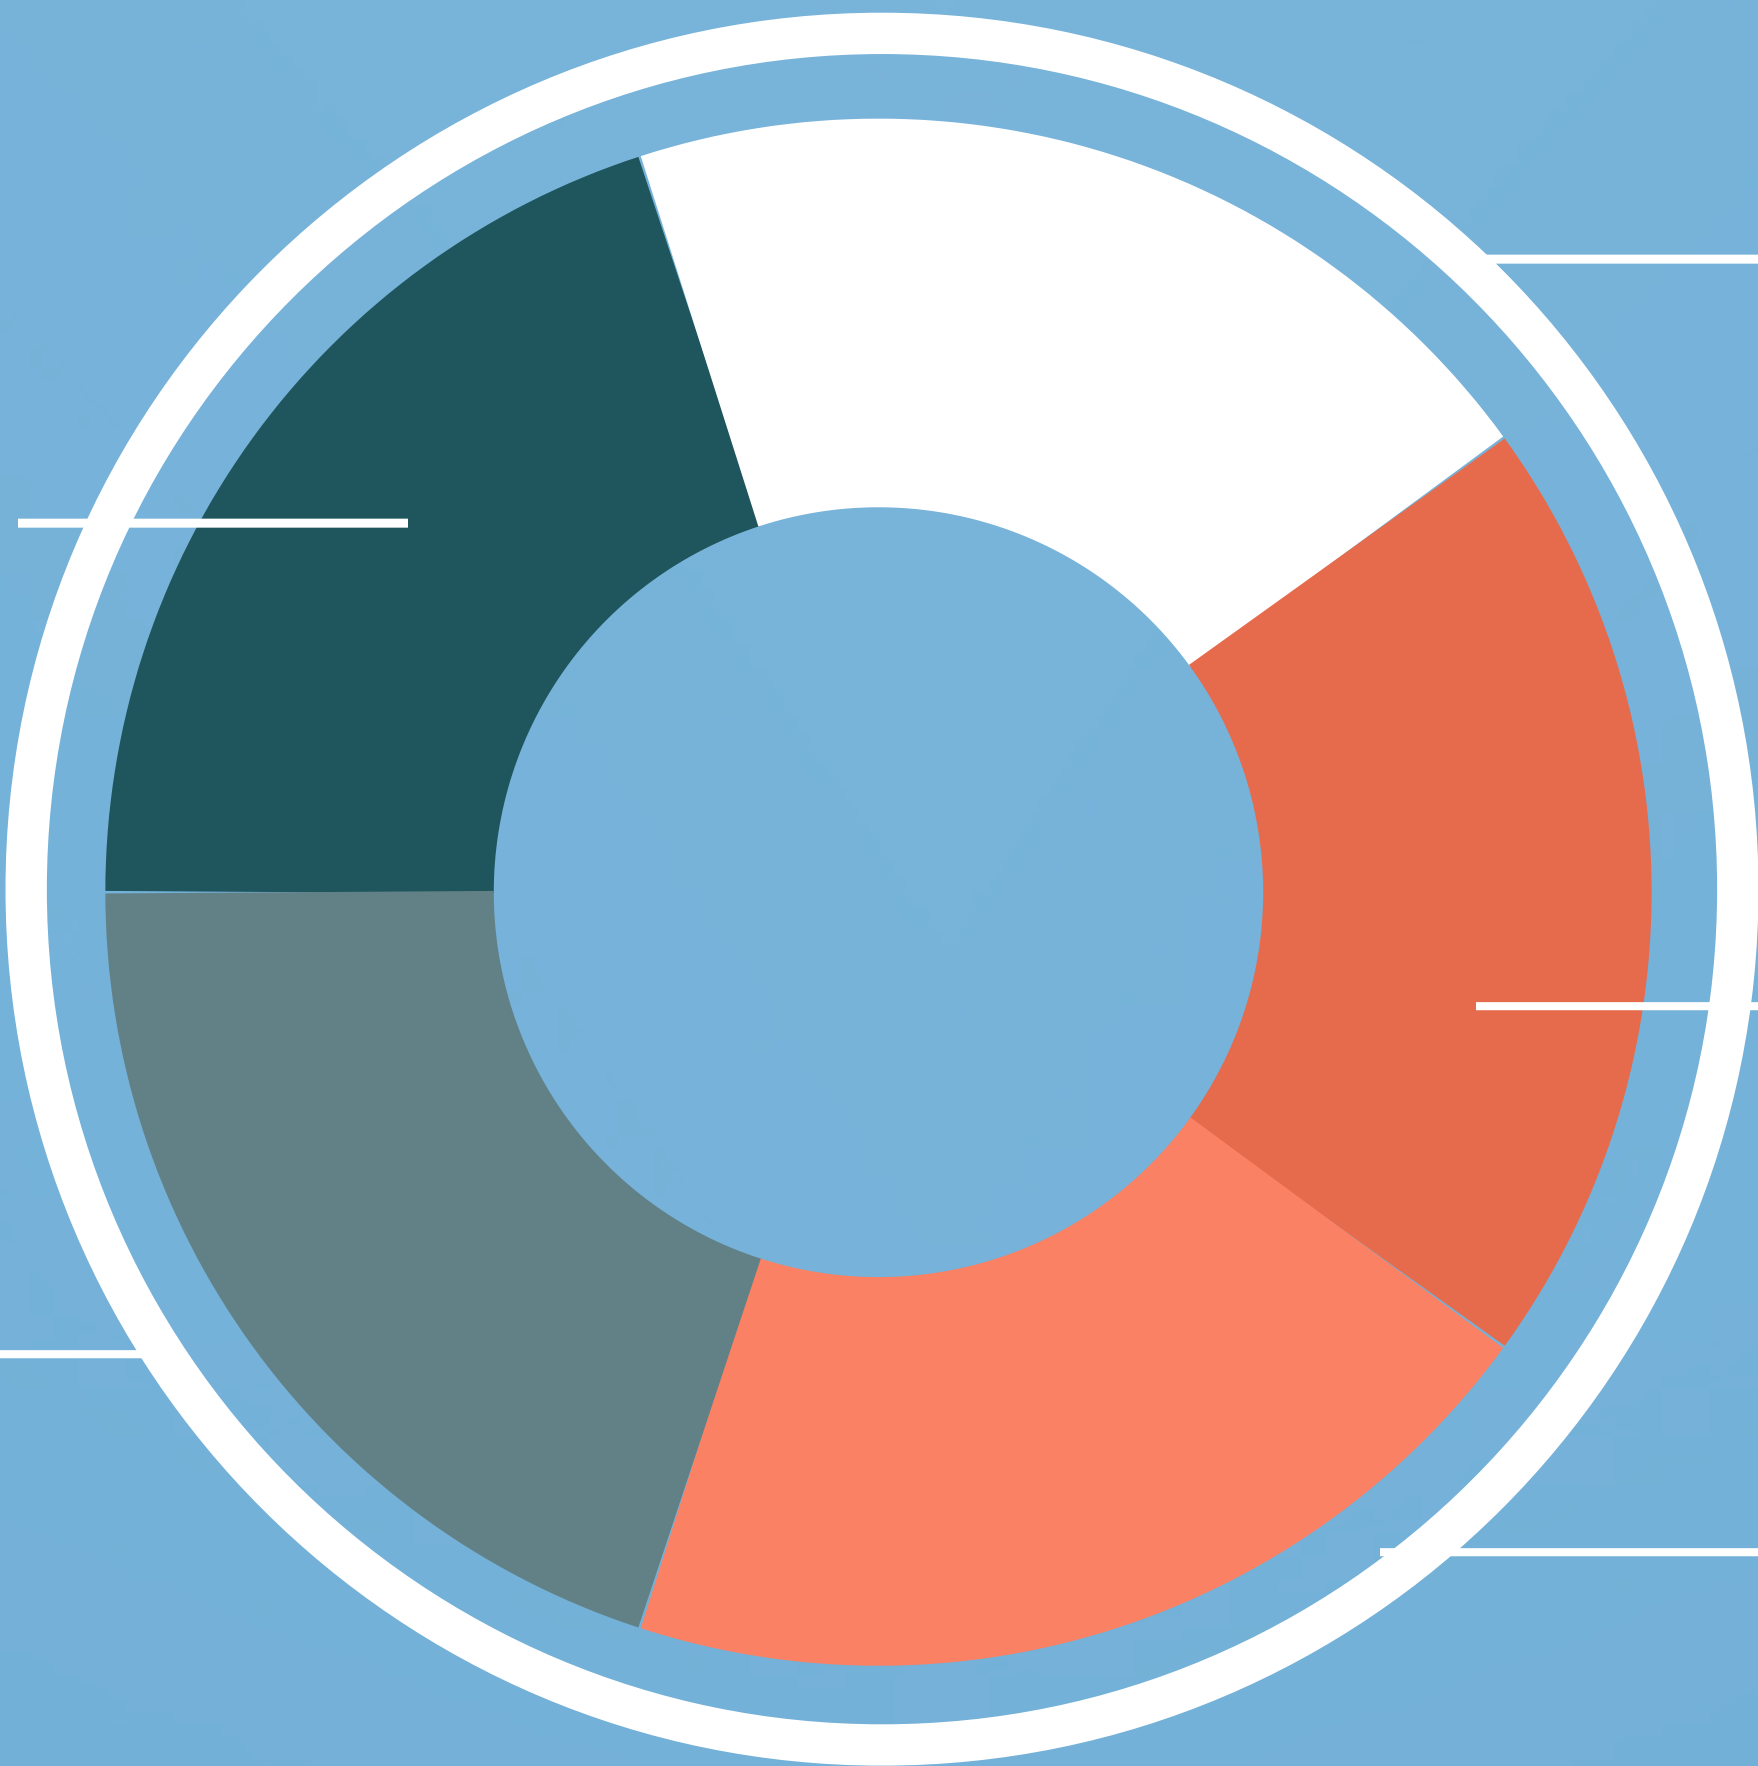

# Perfectly Optimized and Secure

## Sky-Lending
Fully secure lending system optimized for users.

## Sky-Host
Based on data analysis, automatically optimizing the best investment opportunity, and monitoring the operation of mining RIGs.

## Sky-Hive
Leveraging our mining experiences for years, we will provide the best performance for users.

## Sky-Wallet
The best secure wallet ever, storing your assets perfectly.

## Sky-Cloud
The best cloud mining service with the cloud based technology.

Designed by:
SKYHASH

# Users Can Chat Worldwide On Our Platform Like The Group Chat With The Multiple Communication Tools

□Chat

You can share the information with your favorite ones in a borderless way with the multilingual support feature.

□Coordinate

You can create group chatting room and d even closed one, including the feature of invitation.

□Reputation

You can also make a user valuation with each others. The higher your reputation gets, the more unique rank you get.
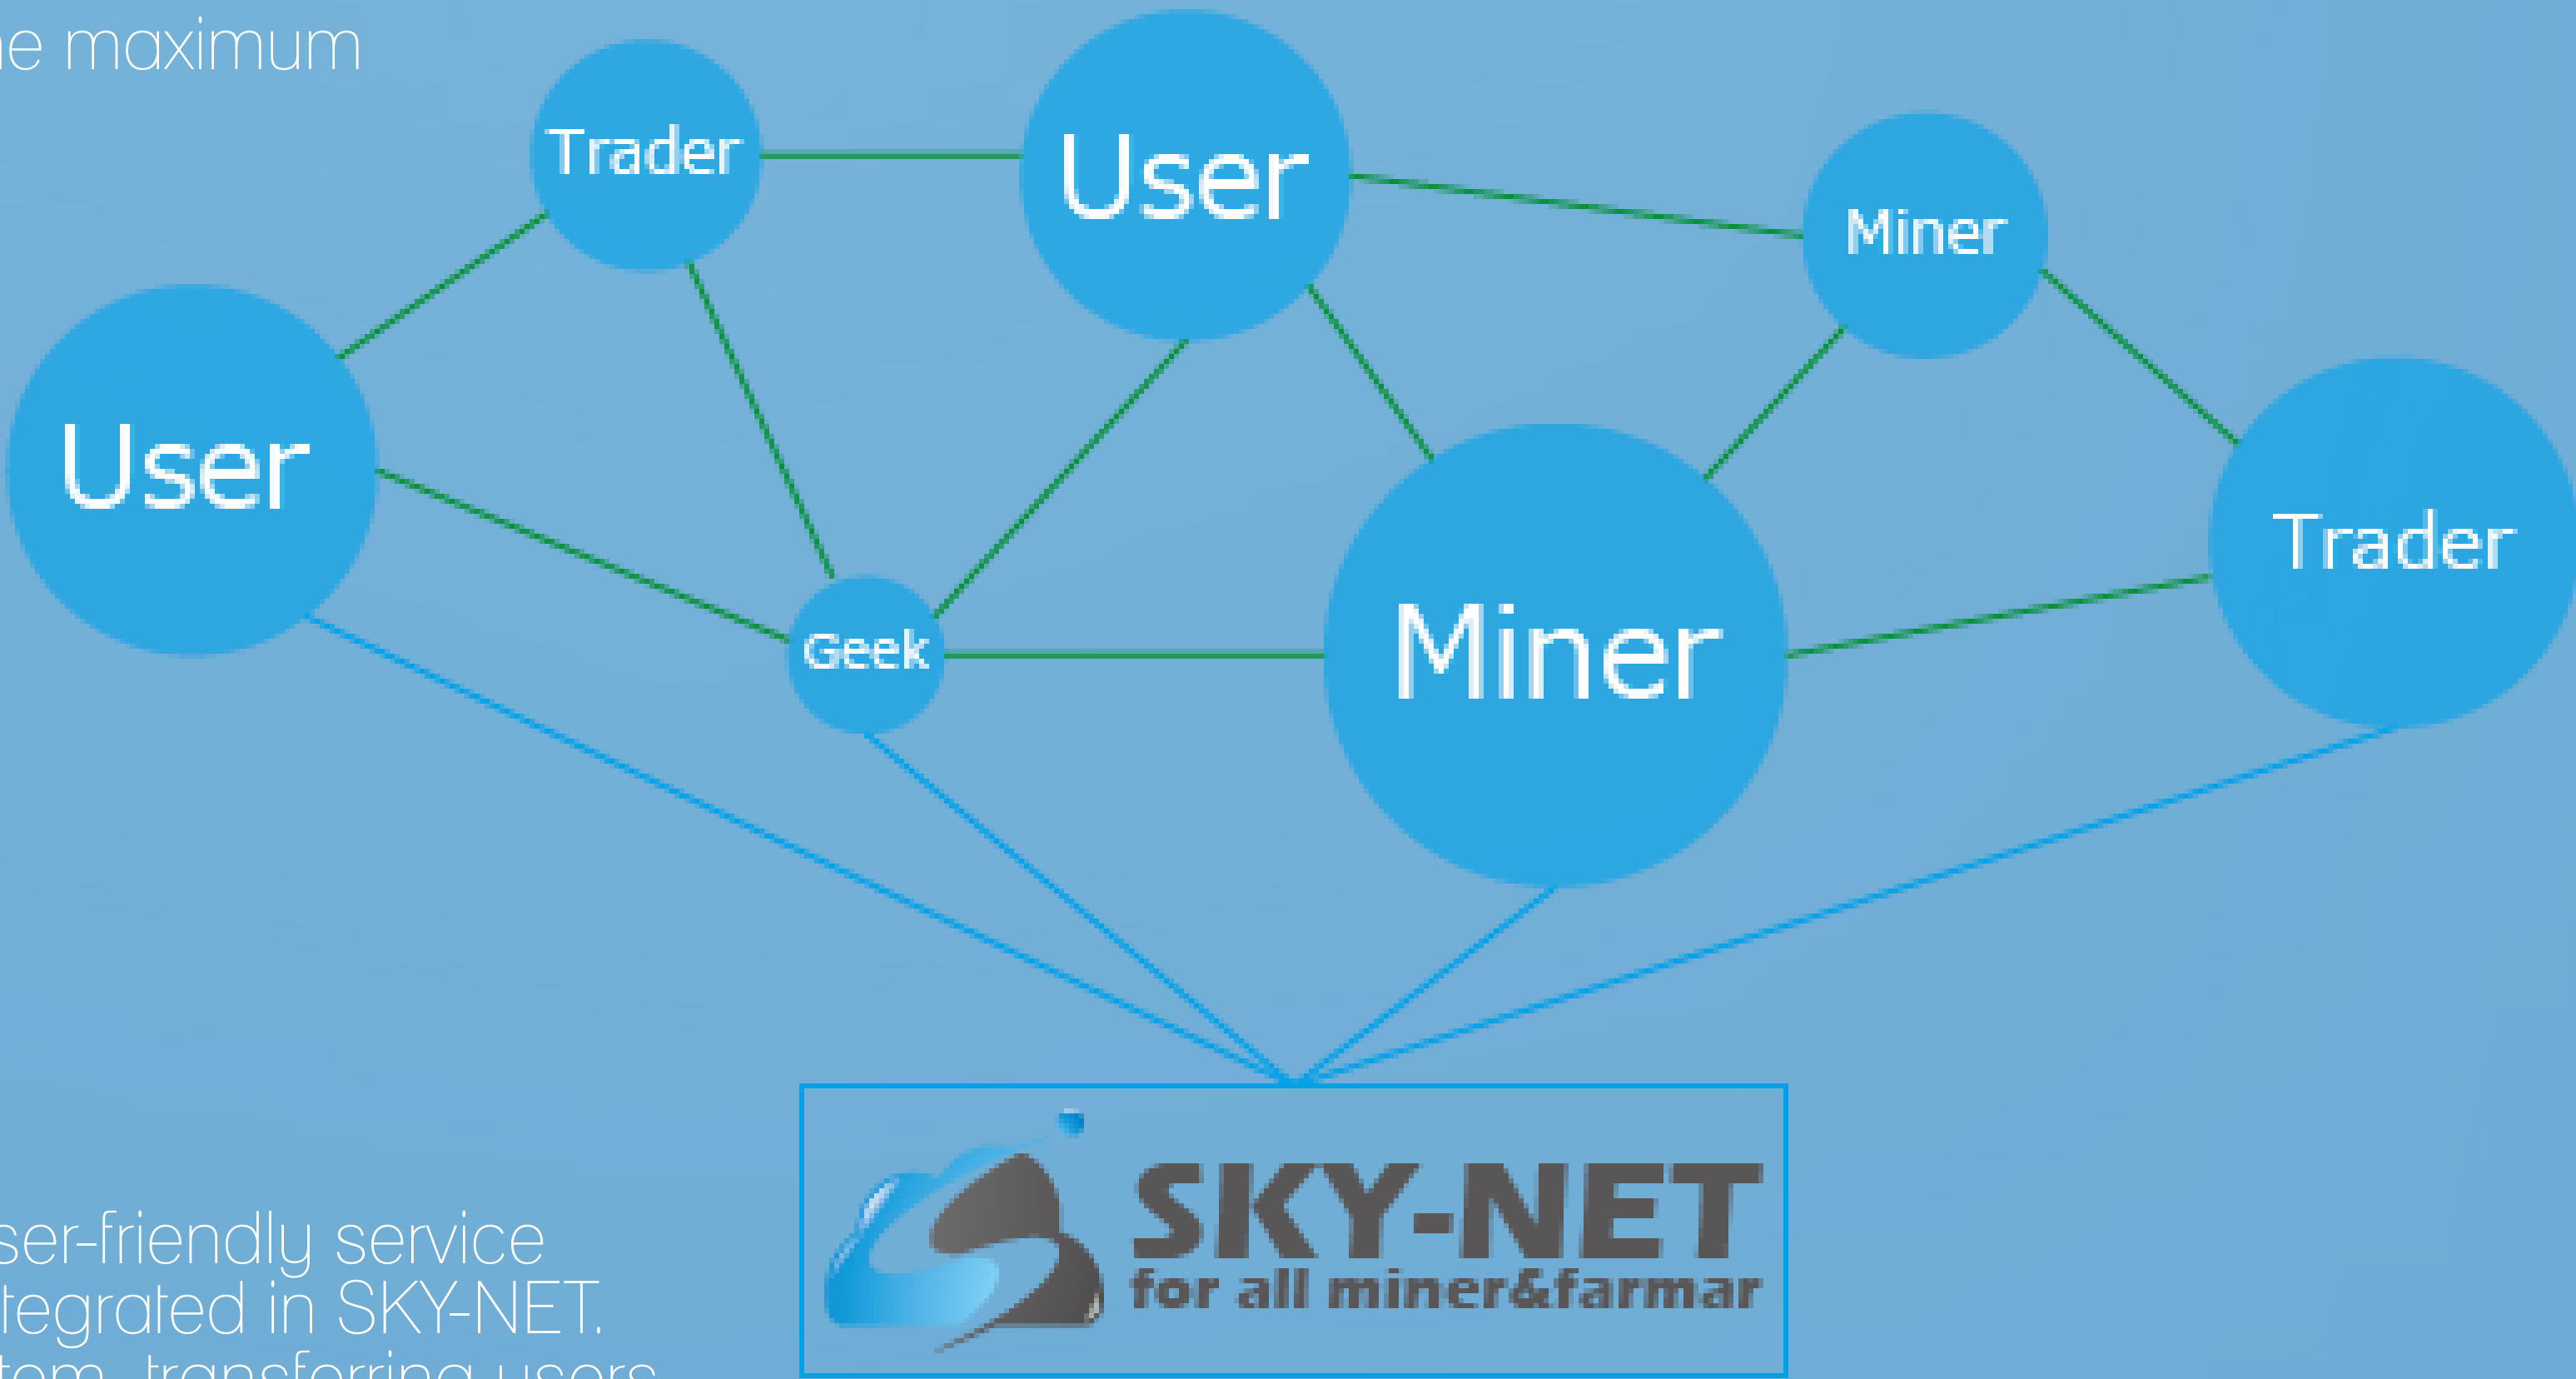

□P2P Transfer
Friends can send money with P2P. (Not all currencies accepted)

---

# Competitive Advantages Of SKY-NET Scalability

SKY-NET will provide Crypto users the maximum advantages and usability.

We will provide more efficient and user-friendly service than existing services, which is all integrated in SKY-NET. We will build the brand-new ecosystem, transferring users in the existing services to SKY-NET. There are no walls for SKY-NET to grow and develop.

# Multiple Use Cases
# For SKY-NET

Example 1: In General

User can mine without mining
machines!
Every person can get mining reward
on an application to SKY-Cloud or SKY-
Host, securely, which will be deposited
in to our most robust SKY-Wallet.
In addition, after you get rewarded, you
can directly invest it in another services,
which enables you to spread the risks.

Example 2: Miners

Miner can start to mine with maximum
efficiency easily, and its reward will be
secured and stored on our most robust
wallet in the world, SKY-Wallet.
With the reward, you can invest in SKY-
Cloud easily so you can start
diversified investment directly.
You can get the real-time rate to judge
if it's positive or negative time to invest.

**SETTINGS**
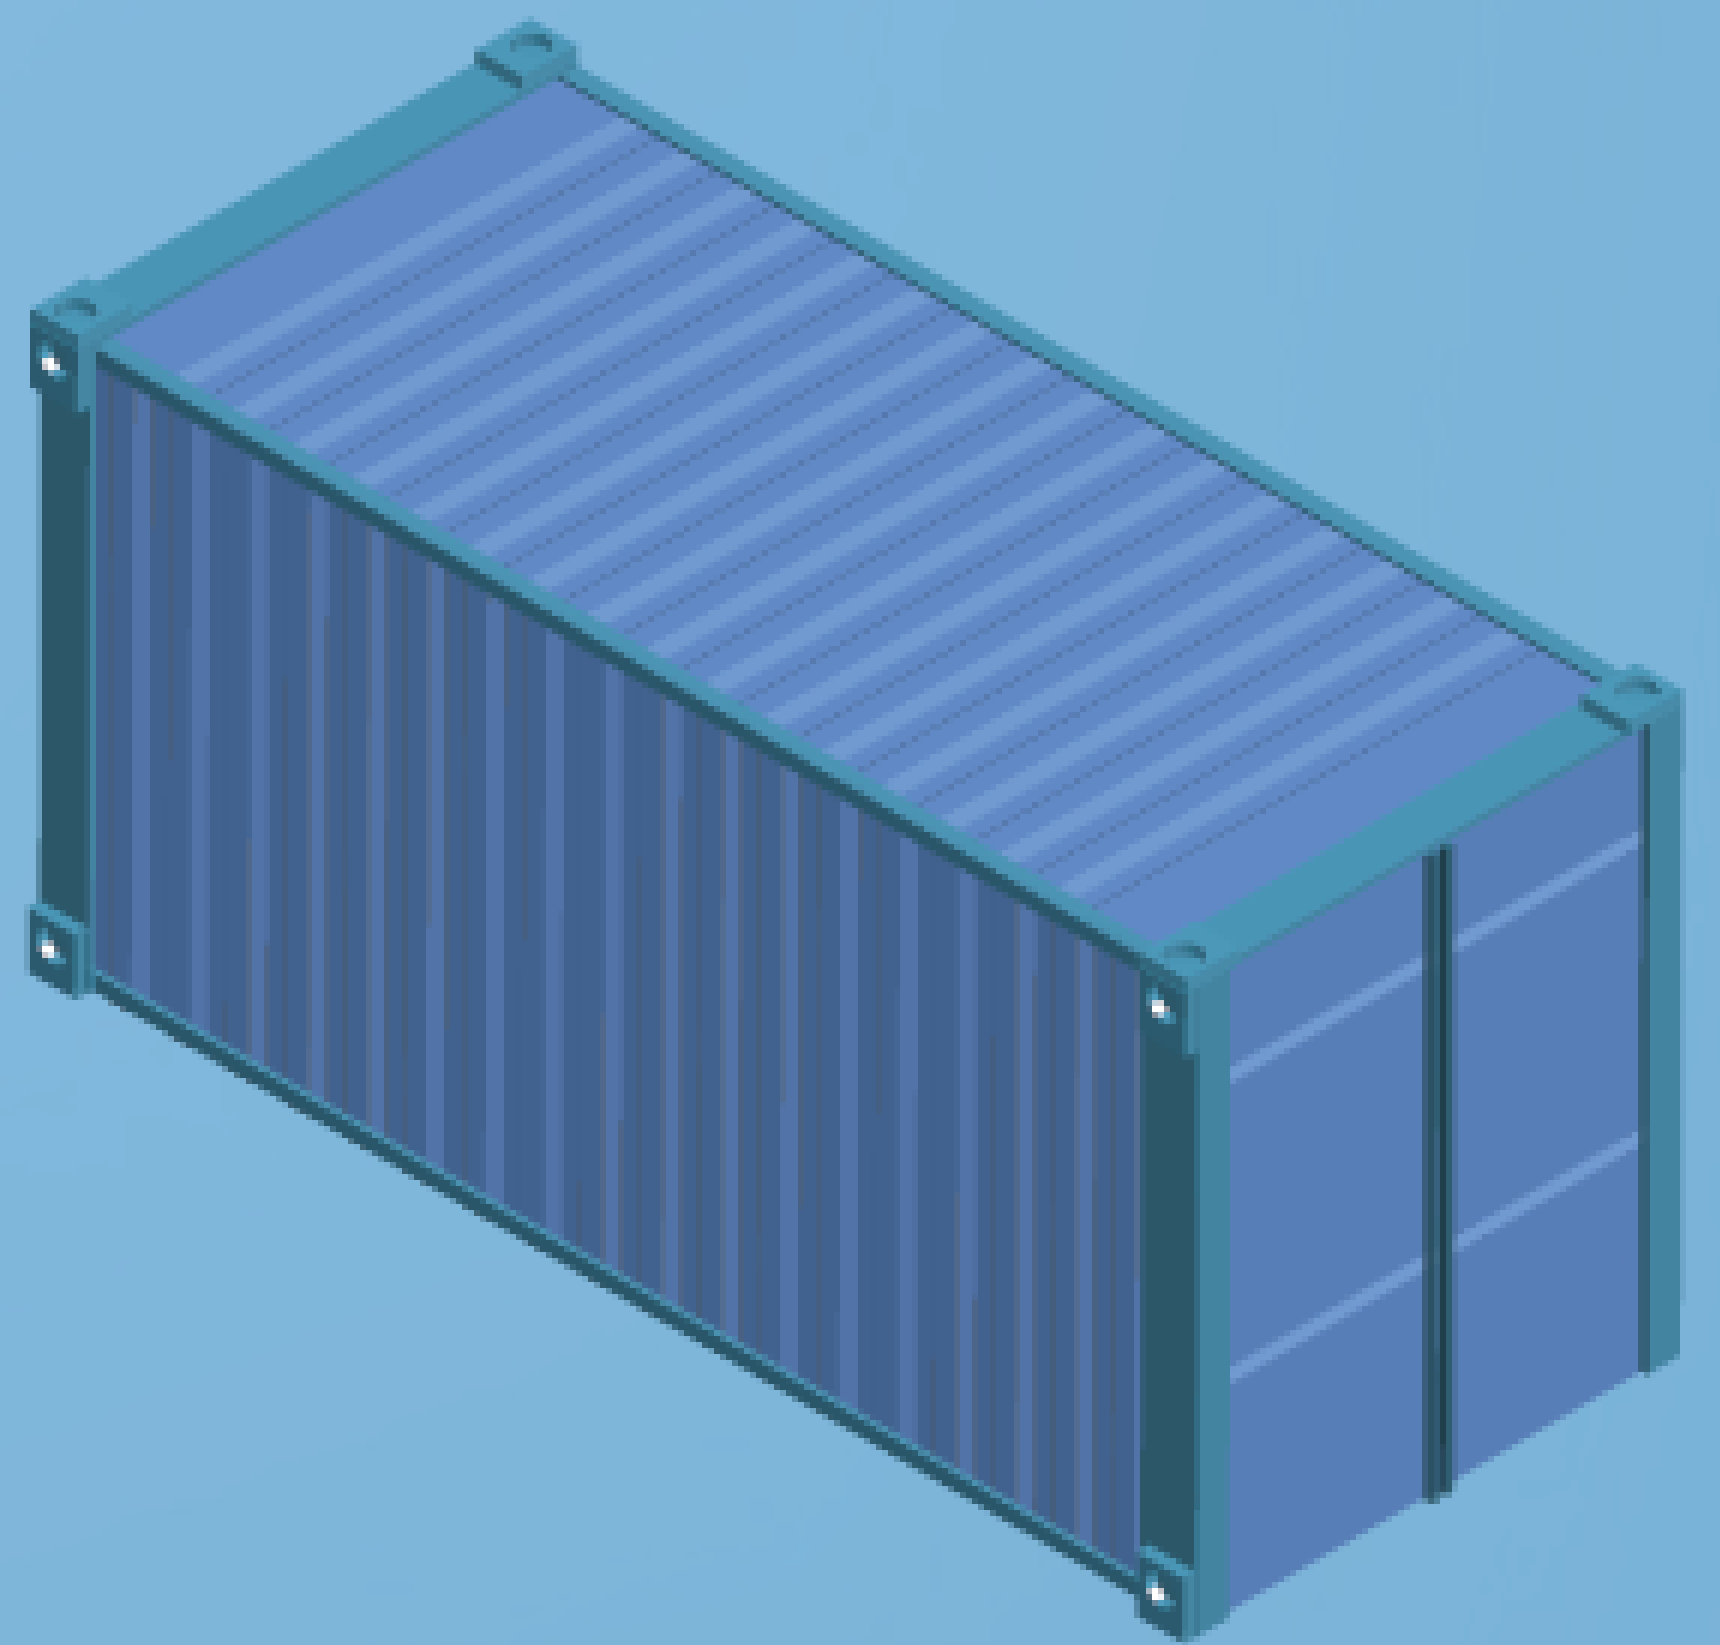

# We Provide The Most Efficient Hash Rate To Every User

Every Machine Optimized, The Performance Is Totally Different.

To mine most efficiently, you need the various factors, like the adjustment of microfabricated core voltage, clocks, appropriate overclocking, and the optimization via encrypted memory timing analysis.
SKY-Hive is the first of its kind in the world, which integrates "Hardware Optimizing System ", and enables every user to mine with the most efficiency easily.
We will provide the multiple services, including smart UI/UX and status in detail with the monitoring system and control system that meet the needs for the large-scale operators to the individuals, which will optimize the users' profits stably.
We will provide the totally different services that used to be unfeasible.

---

## About Sky-Hive

You Don't Need High-Profile Knowledge Or Experience Any More.
With SKYHASH, Every User Can Benefit About 30% Improvement In Profits.

□Tuning

The original Vbios Bulk-Change System and Hardware Optimization Technology by SKYHASH are implemented.
We will provide the solution for exerting performance at the maximum to every user.
This technology is very revolutionary for every miner in the world.
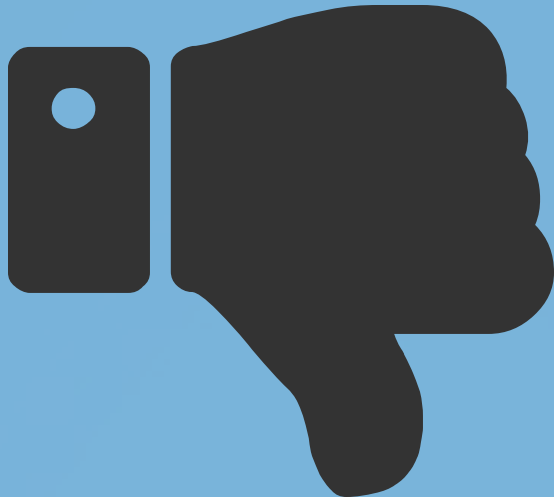

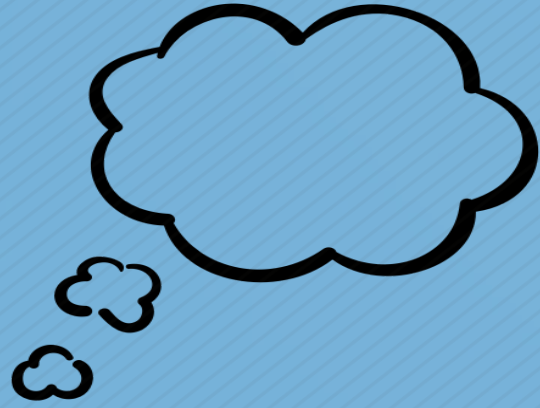

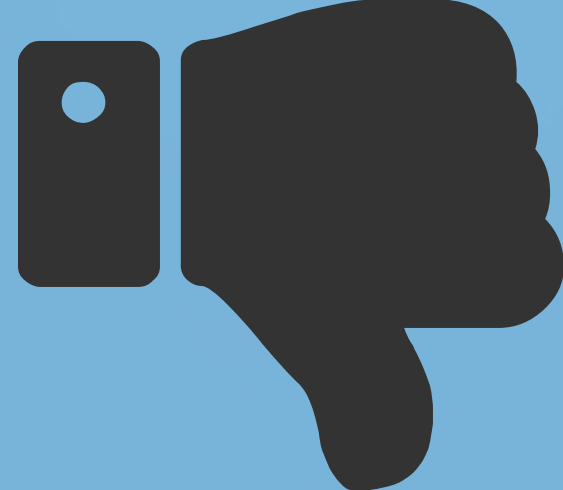

□Control

We will provide the most robust and secure network via VPN against external malicious threats.
Grouping machines, you can change and choose coin to mine with one-click easily.

□Monitoring

It's very important for miner to monitor the status quo of GPU and ASIC accurately.
We will send an alert email if the trouble occurs as the Hash Rate goes down.

---

# Comparison To The Competitors' Products

| | Adaptability | Scalability | Usability | Feature |
|---|---|---|---|---|
| ETH OS | 💭 | 👎 | 💭 | 👌 |
| Hive OS | 👌 | 👎 | 👌 | 👌 |
| Windows | 💭 | 👎 | 💭 | 💭 |
| SKYHASH | 👍 | 👍 | 👍 | 👍 |

SKY-Hive has scalability,
and the one and only
solution for user to start to
mine smart.
Unrivaled, Fast, and Secure.
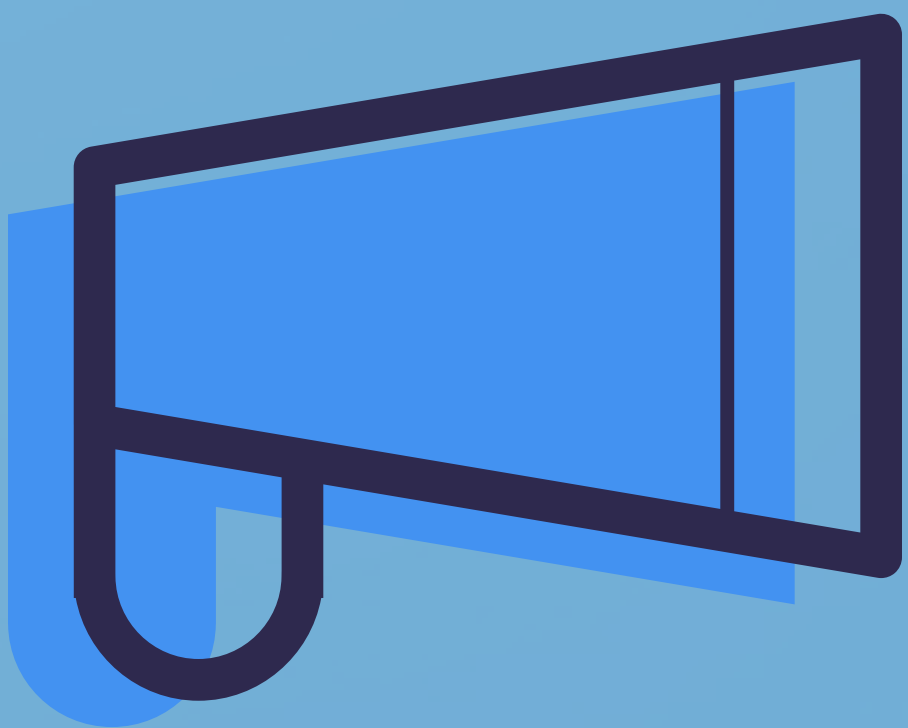

# Function Of Sky-Hive

## Vbios Bulk-Change System
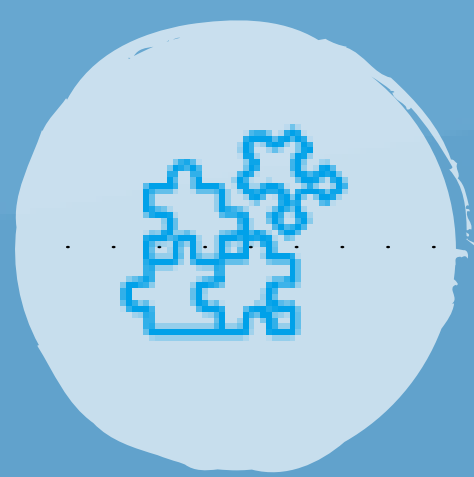

SKY-Hash takes advantages of the unique know-hows that we have cultivated in the market.You can mine easily with one-click like a mining-pro, since our engineers analyze and optimize the data, which will be provided to you.No need for setting up mining rigs on your own.

## GPU Optimization System

GPU Optimization System is implemented by a unique method to analyze, which will be a help for every user to enter uncharted territory. The world's first GPU Optimization System designed by the world's top expert, Dr.Takahashi who published many papers at IEEE, will be integrated in SKY-Hive.
Compared to another competing OSes, SKY-Hive will provide users about 20% Hash Rate improvements with about 10% lower power consumption, which is absolute advantage.

## Real-Time Detailed Monitoring

SKY-Hive monitoring system displays from the temperature of GPU to Hash Rate at work in detail, which is very critical for the secure operation of mining and useable for the index for trading as well.
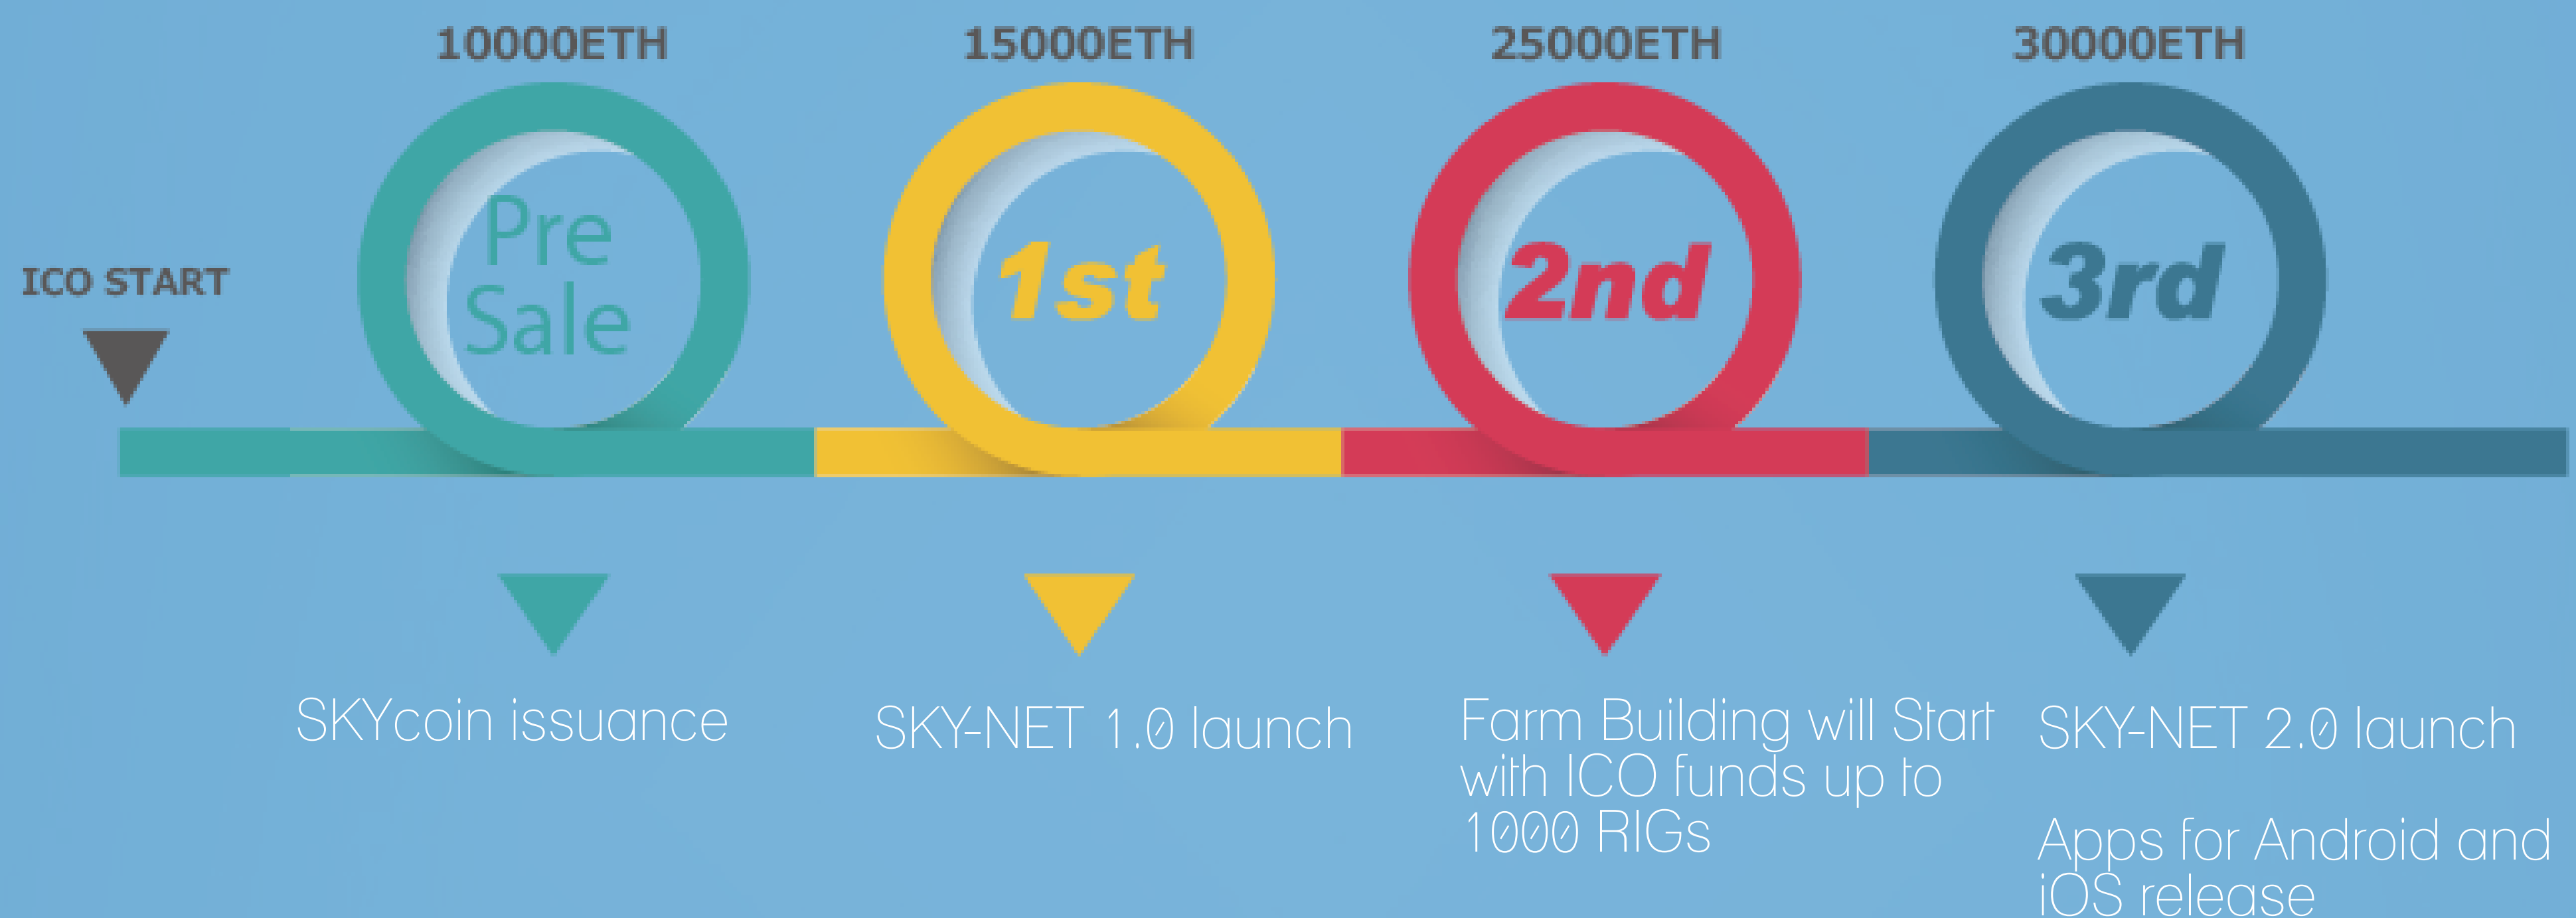

## Rigorous Temperature Management

Heat Management is critical to ensure the stable operation of Mining. SKY-Hive will be a watchdog that monitors temperature for all of the chips on machines, which throttles clocks automatically when overheated to prevent a fault from occuring.

# Roadmap

SKYcoin issuance

SKY-NET 1.0 launch

Farm Building will Start with ICO funds up to 1000 RIGs

SKY-NET 2.0 launch

Apps for Android and iOS release

# What is SKYcoin?

Skycoin (SKY) is the utility token SKYHASH issues for ICO, which is used for the reward token, and will be used for the incentive, reward promotion by Staking, and such within the SKY-NET ecosystem. SKY will be issued up to about 20 million. SKY holders can gain the RIG right to mine at the mining farm built by a part of funds raised, and also gain pre-mined RIG.
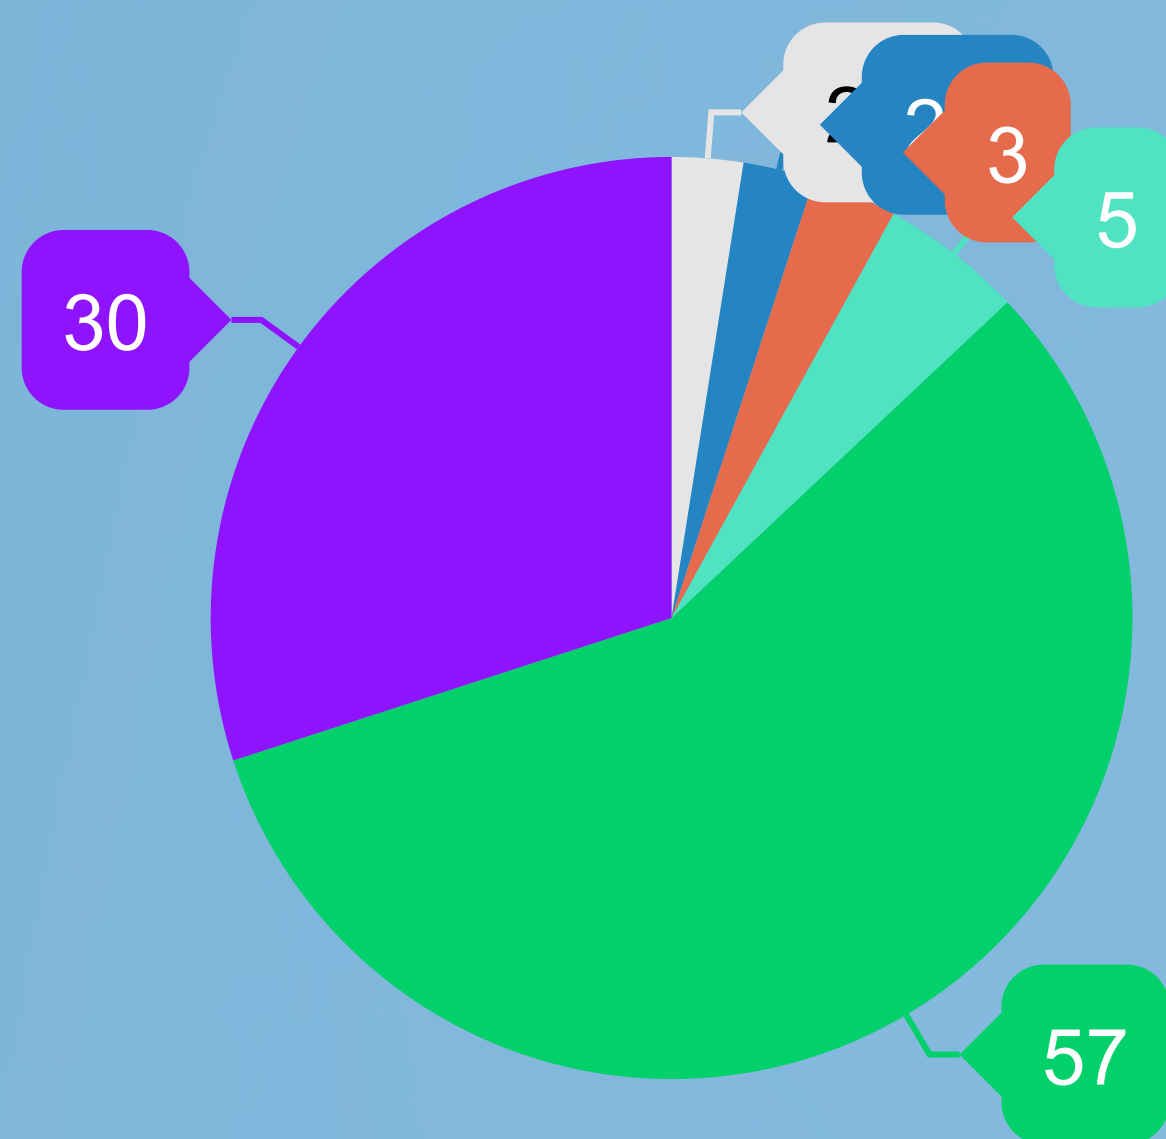

### ERC-223
1SKY = 1EURO

# What is RIGToken (RIG)?

It's Japan's first Mining Token issued by ERC-918, which will be provided worldwide via mining by users for creating the community that supports the decentralized ecosystem.
RIG represents fairness and decentralization, and empowered by SKY-NET users.

### ERC-918

## The Scale Of Crypto Mining and Our Goal

All of Mining Farms and Miners are potential SKY-NET users, since people mainly mine BTC and the various kinds of Cryptos in the world, which equals more than 50 billion dollars at current prices and have created its own huge economy.

Our goal is to gain 10% market share out of total Hash Rate in the world.

# Why You Invest In Us?

## History

Between in 2016 to early 2017, most crypto mining farms were based in China, since mostly the cost was cheap, subsidized electricity in most places across rural China. However, China started cracking down on crypto mining farms in late 2017.

## Future

Today, the existing system of Capitalism is about to change its shape. Including Uber or that type of sharing services, even the US companies have been producing the products that we never have seen or heard before, whose totally difference is that we will not have to depend on the centralized system but the value itself we or the entities produce through the decentralized system like Blockchain or its tokens securitized by the value itself.
It is not an investment anymore. We will have to choose how to live or what to invest in, which means that we will have to choose another options except for fiat currencies in the future. So as you can see, right now, we're in the golden age to leverage our life. That's why we are here. Out of the centralized system driven by the decentralized algorithm, you can make your own money with our automated Cloud Mining ecosystem we provide.
